Core: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks: Vue.js 3, Nuxt.js 2 & 3, Basic React.js

State Management: Pinia, Vuex

UI Libraries: Vuetify, Tailwind CSS, Bootstrap, SASS

Tools & DevOps: Git, GitHub, Google Tag Manager, Google PageSpeed

Analytics & Marketing: Meta Pixel, TikTok Pixel, gtag.js, GTM

Integrations: RESTful APIs, Payment Gateways (7+ methods), Google Maps API

Other: Basic PHP, Basic WordPress, SEO, Web Performance Optimization

WORK EXPERIENCE

Frontend Developer | Rivix — Remote · Full-Time

Oct 2025 – Present

- Developed and maintained the company's public-facing marketing website (rivix.app) built with Nuxt 3, ensuring high performance, SEO optimization, and multi-language support (Arabic/English).
- Built and maintained the Brand Dashboard using Vue 3, enabling brands to create campaigns, manage influencer applications, review and approve content, and track campaign performance.
- Built and maintained the Admin Dashboard using Vue 3, providing full control over platform users, campaigns, payments, and content moderation.
- Established and enforced frontend coding standards and best practices across all three products, including component architecture, naming conventions, reusable composables, and consistent state management patterns.
- Collaborated closely with backend and design teams to deliver a seamless, responsive experience across web and mobile viewports.

Frontend Developer | Ish7nha — Remote · Full-Time

Oct 2024 – Oct 2025

- Built the entire application from scratch using Nuxt 3, Pinia, and Sanctum Nuxt Auth for secure and efficient authentication.
- Designed and implemented the frontend architecture, ensuring long-term maintainability and scalability.
- Achieved a perfect 100/100 score on Google PageSpeed Insights / Lighthouse performance metrics.
- Integrated 7+ payment methods widely used across the MENA region (STC Pay, Mobily, Visa, Mada, UrPay, Iraqcom, Apple Pay), enhancing platform accessibility and revenue.
- Implemented advanced SEO strategies that significantly improved Google search rankings and organic visibility.
- Set up user tracking systems using Google Tag Manager (GTM), gtag.js, Meta Pixel, and TikTok Pixel to support analytics and targeted marketing.

Frontend Developer | Scientific Thought — Part-Time

Mar 2024 – Mar 2025

- Optimized application performance through code refactoring and implementation of frontend best practices.
- Implemented a responsive design strategy that improved mobile accessibility by 60%, significantly increasing mobile user engagement.

Frontend Developer | Depo — Remote · Full-Time

Jun 2023 – Sep 2024

- Developed and maintained user-friendly, responsive web applications using Vue.js and Nuxt.js.
- Built complex data-driven interfaces ensuring accessibility and performance across all devices.
- Integrated RESTful APIs to dynamically update content and deliver a seamless user experience.
- Implemented Vuex for efficient state management across complex multi-component applications.

Frontend Developer | Business Building — Part-Time

May 2023 – Sep 2023

- Designed and implemented dynamic, responsive user interfaces using Vue.js.
- Developed real-time features including payment processing and notifications, enhancing platform interactivity.

Frontend Developer | Grand Community — Full-Time

May 2022 – May 2023

- Spearheaded the migration of legacy frontend code to a modern Vue.js and Nuxt.js framework.
- Collaborated with stakeholders to define project requirements and deliver solutions aligned with business goals.
- Managed component state to ensure data consistency and improve overall application architecture.
- Contributed to migrating the company's main website to a modern JavaScript framework, resulting in a 35% improvement in site performance.

Frontend Developer | Moltaqa Tech — Full-Time

Mar 2021 – May 2022

- Designed and implemented complex user interfaces and web applications using Vue.js.
- Collaborated with UX/UI designers to optimize interfaces, reducing page load time by 30% and improving overall user experience.
- Developed fully responsive layouts ensuring optimal performance on both mobile and desktop devices.

KEY PROJECTS

Rivix — Marketing Website (rivix.app) [Nuxt 3 · Tailwind CSS · Pinia · Vuetify]

Link: <https://rivix.app/>

The official public-facing website of Rivix, a platform connecting brands with influencers through transparent, results-driven campaigns.

- Built the full website from scratch with Nuxt 3, implementing SSR for optimal SEO performance and fast initial page load.
- Implemented full Arabic/English multi-language support with dynamic RTL/LTR layout switching using Nuxt i18n.
- Designed and developed all landing pages including Home, For Brands, For Influencers, About, Solutions, and Contact.
- Integrated smooth animations and interactive UI elements to enhance user engagement and brand presentation.
- Optimized Core Web Vitals achieving high scores on Google PageSpeed across desktop and mobile.

Rivix — Brand Dashboard [Vue 3 · Tailwind CSS · Pinia · Vuetify]

Link: <https://brand.rivix.app/login>

A comprehensive dashboard for brands to manage their entire influencer marketing lifecycle on the Rivix platform.

- Built the campaign creation flow allowing brands to define goals, budgets, timelines, and target audience in a multi-step form with full validation.
- Developed the influencer applications management interface, enabling brands to review applicant profiles, audience analytics, and content style, then accept or reject with feedback.
- Implemented a content review and approval module where brands can view submitted deliverables, request revisions, and give final approval before content goes live.
- Built real-time campaign performance tracking views displaying key metrics such as reach, engagement, and ROI per campaign.
- Integrated a secure in-platform wallet and payment flow for campaign budgeting and influencer payouts.
- Managed all API integrations and handled complex async state using Pinia stores scoped per domain (campaigns, influencers, payments).
- Ensured full responsiveness across desktop and tablet viewports with accessible, keyboard-navigable UI components.

Ish7nha [Nuxt 3 · Tailwind CSS · Pinia · Sanctum Auth · Nuxt UI]

Link: <https://ish7nha.com/>

A professional e-commerce platform for digital gaming products and gift cards, offering instant delivery across the MENA region.

- Integrated 7+ payment methods including STC Pay, Mobily, Visa, Mada, UrPay, Iraqcom, and Apple Pay.
- Developed a custom Wallet feature for balance management, transaction history, and seamless purchases.
- Implemented advanced SEO strategies significantly improving platform visibility across major search engines.
- Integrated GTM, Meta Pixel, TikTok Pixel, and gtag.js for analytics and targeted marketing.

Interact Learn [Vue 3 · Tailwind CSS · Vuetify · Vuex]

Link: <https://interact-learn.co/>

A digital transformation platform developed in partnership with Saudi universities to modernize the educational ecosystem.

- Supported multi-role registration for students, teachers, publishers, and book authors with online book purchasing.
- Built a comprehensive admin dashboard for full control over users, content, and platform operations.
- Handled REST API integration and managed app state with Vuex; integrated payment methods.

Egrar Academy [Vue 3 · Tailwind CSS · Vuetify · Vuex]

Link: <https://myacademy.sa/>

An e-learning platform focused on accounting education with online exams, assignments, and attendance tracking.

- Implemented course subscription, online exams, assignment submission, and student attendance tracking.

Seenpark [Vue 3 · Tailwind CSS · Vuetify · Vuex]

Link: <https://seenpark.sa/>

A platform for booking studios, finding photography jobs, and renting equipment, with a user management dashboard.

- Integrated payment methods, WhatsApp chatbot, and real-time notifications into the platform.

Grand Community [Vue.js · Nuxt.js]

Link: <https://try-gc.com/ar>

A community platform migrated from legacy frontend code to a modern Vue.js and Nuxt.js architecture.

- Spearheaded the migration of legacy frontend code to a modern Vue.js and Nuxt.js framework, resulting in a 35% improvement in site performance.
- Collaborated with stakeholders to define project requirements and deliver solutions aligned with business goals.
- Managed component state to ensure data consistency and improve overall application architecture.

Open Stock — Multi-Vendor E-Commerce Platform [Vue.js · Vuetify · Vuex]

A scalable marketplace (similar to Noon) allowing multiple vendors to manage storefronts and products via a dedicated dashboard.

- Took full ownership of frontend development, building the entire user and vendor experience from scratch.
- Designed a fully responsive vendor dashboard for product, order, inventory, and store management.
- Focused on performance optimization and maintainable, modular, well-documented code.

Reader AI [HTML Canvas · Vanilla JavaScript · AI APIs]

An interactive digital reading platform simulating the physical book experience, enhanced with AI-powered accessibility features.

- Built a custom book reading experience using HTML Canvas with realistic page display and interaction.
- Implemented AI text-to-speech functionality with natural voice rendering for enhanced accessibility.
- Integrated an inline translation feature for instant line-by-line translation.

Ish7nha eSIM [Nuxt 3 · Tailwind CSS · Pinia]

A platform for purchasing eSIMs, enabling travelers to get instant mobile data connectivity anywhere in the world.

- Built the storefront and purchase flow for browsing and buying eSIM plans by country/region.
- Integrated payment processing and instant digital delivery of eSIM QR codes/activation details.
